LOBA On Top!

LOBA loves beautiful floors. As a family-run company with a tradition spanning a century, we offer you modern products for the creation, finishing and maintenance of surfaces made of wood and cork, as well as resilient and mineral floorings. LOBA attaches the highest value to user-friendly, safe and sustainable products. Out of responsibility towards people and nature, we have long focused on the development of environmentally compatible, solvent-free systems – for a living environment that makes us all feel good.

You can find all of LOBA's milestones since 1922 here.

ORANGE ZONE

The inaugural issue of the LOBA customer magazine, ORANGE ZONE, will be published in April. Informative and practical, this German-English bilingual magazine provides added value in the areas of news, technology, and service."

2023

100 YEARS LOBA

"Creating the future together" – LOBA celebrates 100 years of technical excellence and innovation, passion, and outstanding service.

LOBA On Top! Produced in Germany – made for the world.

2022

NEW GROUND

Cool, individual, timeless – minimal industrial style through an exposed concrete look: Market launch of the Factory Line, LOBA's first water-based finish system for leveling compounds.

INVISIBLE SURFACE PROTECTION

Market launch of the invisible water-based surface protection 2K InvisibleProtect. Thanks to its innovative technology, it achieves a look and feel that appears even more natural than raw wood.

2015

INVESTMENT IN THE FUTURE

The new logistics and training center in Ditzingen, Germany is opened.

2006

PARTNERSHIP WITH WAKOL

FOUNDING

On April 13, 1922, Wilhelm Hornung and Dr. Max Fischer found Vereinigte Wachswarenfabriken AG Hornung und Dr. Fischer in Ditzingen, near Stuttgart, Germany.

1995

INNOVATION

With the introduction of the legendary WS 2K 95, the world's first water-based 2K hardwood floor finish system, LOBA sets a new standard in the industry.

1922

The product range includes floor stains, floor cleaners, floor polish, ski wax, shoe polish, leather grease, and household candles. Already in September 1922, 20 candle machines produce 85 tons of household candles.

MILESTONES

Excellent! Sustainability at LOBA

When it comes to sustainability, LOBA solutions are the perfect companion for every step of the process – not just for new-builds, but also and especially in refurbishment projects. At the company level as well, we've set ourselves some lofty goals.

REFURBISH INSTEAD OF USING NEW

Convince your customers to give hardwood flooring a second chance! Old flooring, when restored to a high standard, is often a beautiful alternative to new flooring. It also tells a story, and not infrequently turns out to be the more economical solution. By far, however, it's the more sustainable option: Renovating a hardwood floor conserves resources and is environmentally friendly. It also avoids waste and produces less CO₂ than a complete replacement.

PRODUCTS INSPIRED BY SUSTAINABILITY

As part of our traditional role as a pioneer in the development of water-based 2K finishes, sustainable formulas can be found throughout the range of LOBA finishing products – out of responsibility towards our customers, end users and employees. Numerous labels, such as the coveted GEVEMICODE®, the French "Emissions dans l'air intérieur" seal, or the Scandinavian "M1" mark, bear testimony to our commitment that extends far beyond national borders.

SUSTAINABLE AND FAIR: OUR DELIVERY PROCESSES

To make sure our suppliers meet our rigorous standards, they agree to our code of conduct, which requires them to understand, follow, and champion our values and principles in environmental protection, social responsibility, and governance. As part of this commitment, we have also dedicated ourselves the United Nations' Sustainable Development Goals.

ISO-CERTIFIED QUALITY AND ENVIRONMENTAL MANAGEMENT

LOBA has been DEKRA-certified since 2011 as compliant with ISO 9001 and ISO 14001. These certificates stand for high standards in quality and environmental management and confirm the ongoing improvement of our performance in terms of process, product and service quality as well as environmental protection. As a result, we operate a solid business with long-term personnel planning – and 100% of our electricity comes from green energy sources.

CONNECTED
SYSTEMS

A STRONG CONNECTION FOR YOUR SUCCESS

Connected Systems
Perfect results
for your projects

Your benefits with LOBA WAKOL Connected Systems

- Perfectly coordinated products
- Maximum safety during application
- Successful handling in a tried-and-tested, guaranteed system
- Exclusion of interactions between oils/ finishes and adhesives
- Avoidance of dark run-ins at short end joints
- Avoidance of dark joints, since there is no softening of the finish layer
- Long-term quality assurance through regular tests in the event of formula adjustments

We care about your success!

Cleaning & Care

LOBA loves hardwood floors

With LOBA premium systems, you can finish and protect hardwood floors in first-class quality.

Our finishing products and oils offer ideal protection against dirt, wear, chemicals, and moisture and are perfect for finishing hardwood floors and cork. Solutions from LOBA are not only extremely robust and durable; they also offer an attractive appearance that accentuates the hardwood floor's natural charm.

Preparation is everything

With our water-based joint fillers, even large joints in hardwood flooring can be filled beautifully and small imperfections touched up, thereby resulting in the perfect color match, even on exotic wood. Regardless of whether the surface of the hardwood floor is treated with impregnating oil, hardwax oil or finish, with LOBA fillers for your floor covering, you're ready for any challenge.

EasyFill

Water-based binder.

- Easy to work with
- Closes even wider joints by one-time application
- No subsiding of the filler in the joint
- Very fast drying
- Excellent sandability; clearly visible and low adhesion on sanding paper
- Excellent color scheme for oiled and finished surfaces
- Applicable to all common European and exotic wood types
- Odor neutral

APPLICATION DEVICE	ml/m ²
Trowel	100

Wood

Primers for maximum adhesion

Play it safe and prepare hardwood flooring with water-based primers from LOBA. These not only improve the adhesion on the surface, but also seal in timber constituents and reduce the risk of side bonding and lap marks. LOBA primers, depending on the selection, can be used on European and exotic hardwoods, as well as in gyms and multi-purpose halls. If you want to color and subsequently finish hardwood flooring, you can create color accents with a special pre-treatment in order to produce a customized room setting.

EasyPrime

Polyurethane-acrylate water-based primer for roller and trowel application for hardwood floors.

- Used on millions of m² worldwide every year
- All-rounder offering maximum processing reliability
- Premium quality at a fair price
- Reduces side bonding
- Suitable for use with practically all European and exotic woods, as well as in sports and multipurpose halls

APPLICATION DEVICE	ml/m ²

Water-based finishes – sustainable and easy to work with

Professionally laid floors maintain their perfect appearance with the right finishing. The right finishing also ensures ideal protection against dirt, wear, chemicals and moisture across the whole surface and for a long time. Whether you want to finish a hardwood floor or make cork flooring water-resistant – LOBA offers you water-based premium systems for every area of application.

EasyFinish

Water-based 1-component finish for hardwood floors.

- Easy 1K system combined with 2K performance
- Outstanding application qualities – easy to use and safe, no lap marks
- Very low emission, certified to EMICODE® EC1
- Suitable for almost all wood species as well as cork
- EasyFinish semi-gloss combined with LOBA SportCare meets the requirements for friction according to DIN 18032 for sports floors
- Long-lasting beauty of the floor – high resistance to mechanical wear and household chemicals

Whitener

Additive for brightening wood surfaces.

- Creates a smooth brightening of the wood surface
- Intensifies the whitening effect of white colored surfaces
- Variable control of brightening intensity
- May be combined with all water-based primers and finishes from LOBA
- Reduces the natural yellowing of the wood
- Provides individual design options
- Water-based technology, solvent-free
- Simple and safe application

ART.-NO.			GISCODE
11540-900126	80 ml	15	W1

Amberizer

Additive to achieve a color intensification of wood surfaces.

- May be combined with all water-based primers and finishes from LOBA
- Adjustment of newly finished surfaces to solvent-containing finished existing surfaces
- Water-based technology, solvent-free
- Simple and safe application

ART.-NO.			GISCODE
11540-800217	100 ml	15	W1

UV-Protect

Prevents the UV-light induced yellowing of light colored wood species.

- Original appearance of the wood is preserved long-term
- Can be used for all water-based LOBA finishes
- Innovation by LOBA

ART.-NO.		
11017-000000	100 ml	15

Argo

Additive to prolong the drying time.

- Reduces the risk of lap marks
- Finish film properties are unchanged

ART.-NO.		
11015-000000	250 ml	12

Rush

UV-curing 1-component water-based polyurethane finish for hardwood floors.

- Sets new standards in quality
- Meets highest demands
- Long durability
- Robust surface
- No waiting time until use

Oils and waxes for naturally beautiful floors

Nothing brings out the naturalness and texture of hardwood flooring as beautifully as oil and wax. LOBA's first-class oil and wax systems perform this task sustainably. Based on natural raw materials, they impress with outstanding properties such as high wear resistance, a water- and dirt-repellent formula and excellent resistance to chemicals.

2K ImpactOil

2-component High Solid oil based on natural ingredients.

- Excellent water resistance for hardwood flooring in wet zones such as bathrooms or spa areas
- Time-saving processing in a 1-day system
- Extremely economical to use
- 100% solid - solvent-free
- Certified anti-slip properties as per DIN EN 16165:2021-12 for work areas
- Easy and safe application
- One roller application is sufficient
- Can be used after only 24 hours
- Suitable for children's toys as per EN 71-3

Coloration with 2K ImpactOil Color

Standard recommendation for the coloring impregnation of hardwood floors.

- 1 Preparation up to fine sanding
- 2 First application of **2K ImpactOil Color** with LOBATool Trowel, allow to penetrate
- 3 After the penetration time, level out with a single-disc machine and LOBASAND SpecialPad beige
- 4 Apply a second layer of **2K ImpactOil Color** with LOBATool Trowel, allow to penetrate
- 5 After the penetration time, level out with a single-disc machine and LOBASAND SpecialPad beige

i Please note the detailed technical information, processing instructions and set-up recommendations as well as technical tips and tricks „Sanding Instruction Staining of Wooden Floors“

Discover the infinite color variety of 2K ImpactOil Color, also in combination with PreTone.
With LOBA care and maintenance products, the beauty of your floors will persist.

Akzent 100 Oil

High Solid oil for wood floors on natural base.

- Made of plant-based oils
- 100% solid – solvent-free
- Extremely economical to use

SportCare with LOBA Wischwiesel

Water-based dispersion care product for finished floors. Protects finished floors against fine scratches and signs of wear with a care film. Prevents early wear and increases the surface's lifespan.

Application with the LOBA Wischwiesel is recommended.

See page 68.

Long-term protection for resilient coverings

Whether you need to finish newly laid designer or vinyl flooring or want to renovate flooring that's looking a little worn: With our water-based system for resilient floor coverings made of vinyl, PVC, LVT or linoleum, you can ensure reliable protection of the surface against dirt, liquids and wear, even in heavy-traffic areas.

2K UltraElastic

Water-based 2-component polyurethane finish for resilient floorings.

- Lap-free application
- Specially developed for renovating linoleum, PVC, CV and LVT coverings
- Reduces the cleaning effort due to reduced dirt adhesion
- Optimised joint protection safeguards the substrate
- Certified anti-slip properties as per DIN EN 16165:2021-12 for work areas

APPLICATION DEVICE

Microfibre 100 - 120 roller

Tip:

Can be re-finished within 24 hours without intermediate sanding, and thereafter with only one intermediate sanding. Intermediate sanding before the last application improves the final visual result. Simply use LOBASAND PerforatedPad P180 or a finer grain size; alternatively you can use LOBASAND SandingGrid P180 or a finer grain size.

Cleaning and care systems for resilient flooring

LOBA offers a wide range of cleaning products that are ideal for the effective and gentle cleaning and care of flooring such as vinyl, PVC, LVT or linoleum.

See page 51.

Concrete look made easy

Cool, individual, timeless: A minimalist industrial look can easily be created with a floor in a concrete look – with the Factory Line from LOBA. The water-based, very low-emissions system retains the natural color and visual effects of cementitious trowelled flooring and thus opens up a wide range of options for designing concrete-look floors.

FactoryBase

Water-based roller primer for cement-based levelling compounds for direct use.

- Easy and safe application
- Time efficient through application in a 2-coat system (1x primer 1x finish)
- Optimizes adhesion between levelling compound and finish
- Applicable in a system with LOBA 2K FactoryStyle and numerous levelling compounds

Design and protection for wooden terraces

From thorough cleaning, finishing and oiling to maintenance – the complete system from LOBA offers perfectly coordinated products for the design, protection and care of your wooden or WPC terrace. The Deck Line is ideal for various wood species, and for both smooth and grooved planks. The treatment effectively protects against UV radiation, frost and moisture.

DeckPrepare

Primer for wooden decks in outdoor areas.

- Delays the weather-related graying of wood
- Strengthens the protective effect of the subsequent surface refinement
- Improves the adhesion of the subsequent coating to the substrate
- Easy and safe application
- Quick-drying
- Color- and odorless
- Environmentally friendly
- Applicable in a system with LOBA DeckFinish Color. Optional application before impregnation with LOBA DeckOil/ Color

Cleaning and care systems for sports flooring

See the Sports Flooring range on page 40.

CareRemover

Wood | Cork | Linoleum | PVC | Tile

Remover for finished floors.

- Removes old layers of care product
- Removes stubborn dirt
- Can be used universally on various finished floors
- Material-protecting and pH-neutral

ART.-NO.				GISCODE
10065-900000	1l/10l	12/-	480/60	GG60

ParkettCare

Wood

Water-based floor care product.

- Maintains the floor's value and appearance
- Provides long-term protection against wear
- Can be used without restriction for prefinished wood floors and for finished UV surfaces
- Recommended by leading industrial wood floor manufacturers
- Brings new shine to heavily used and worn floors
- Easy and safe application

Premium quality abrasives and pads.

The various sanding phases of a new hardwood floor installation or renovation have a considerable influence on the final result. With our LOBASAND product range, we offer professionals a wide range of top-quality abrasives and pads. The high-performance materials and carrier technologies used guarantee effective working with all common machines for best results.

LOBA sanding recommendations: the right combination for every purpose

Standard sanding recommendation

For old and new hardwood floors

COARSE	P40 Zircon for fast removal	
MEDIUM	P60 Ceramic for more effective removal with a long tool life	
FINE	P100 Ceramic for an even sanding pattern	
EDGE	P40 Zircon for fast removal and P80 ceramic for more effectiveness and a fine sanding pattern	

High demands on the sanding result

For preparation for coloring or oiling

COARSE	P40 Zircon for fast removal	
MEDIUM	P80 Ceramic for more effective removal with a long tool life	
FINE	P120 Ceramic for an even sanding pattern	
EDGE	P40 Zircon for fast removal and P80 Ceramic for more effectiveness and a fine sanding pattern	
	P100 Aluminum Oxide with random orbital sander	

Effective for property and residential construction

For sanding hardwood floor (parallel bracing) in preparation for finishing

COARSE	P50 Zircon for fast removal	
MEDIUM	P80 Ceramic for more effective removal with a long tool life	
EDGE	P40 Zircon for fast removal and P80 Ceramic for more effectiveness and a fine sanding pattern	

 Videos of sanding recommendations

PRO TIP:
To even out sanding marks at the edges and on the surface:
PerforatedPad P100/P120 with DustPad

Premium | Ceramic

For the most beautiful sanding pattern and the best tool life

- Achieves the best sanding pattern
- Very long service life
- Extreme heat resistance
- Best price-performance ratio on the market, as it is very resilient
- Suitable for all surface treatments
- For sanding UV-coated floors

Tools and accessories – only the best for professionals!

Since tools are effectively an “extended arm of the craftsman”, they are hugely important. You can expect the best from LOBA in this field, too: We extensively test every applicator and every tool before adding them to our range. Our uncompromising quality standards provide the certainty of being able to work easily, safely and fast in tough everyday situations on the construction site.

Roller Deluxe 120

Ensures the recommended quantity (approx. 120 g/m²). No roller frame included.

ART.-NO.	DESCRIPTION	
16234-000000	25 cm roller	12

Roller Microfibre 100-120

For all LOBA water-based finishes as well as the primers EasyPrime and VivaPrime and Sealer FR. Application quantity between 100-120 g/m². No roller frame included.

ART.-NO.	DESCRIPTION	
16236-000000	25 cm roller	12

Roller Universal 100

For LOBA Rush as well as LOBA primers PrimaSeal Plus. Application quantity approx. 100 g/m². No roller frame included.

ART.-NO.	DESCRIPTION	
16233-000025	25 cm roller	12

Oil roller Microfibre 60-80

For the roller application of oils (LOBA oils and 2K Intensive). Applied quantity: 40-60 g/m². No roller frame included.

ART.-NO.	DESCRIPTION	
16236-100000	25 cm roller	12

Small roller for edges

Roller for edges and other hard-to-reach areas.

ART.-NO.	DESCRIPTION	
16237-000000	10 cm roller	10

Roller frame, roller extension

Roller frame: for finish rollers.
Telescopic bar: roller extension. Can be extended up to 2.5 metres.

Our stress levels at a glance

The new stress levels defined by LOBA help you find the perfect finish for the types of stress your project will be exposed to.

Our teams in the Application Technology and Research & Development departments continuously test LOBA products in order to ensure consistent quality and develop our products further on the basis of new requirements defined by our customers as well as laws and regulations. The tests are extremely comprehensive and examine numerous properties.

Four test categories were chosen that most strongly represent the overall resistance of the finishes:

- **Single scratch**
- **Wear**
- **Abrasion**
- **Chemical resistance**

1K and 2K finishes are evaluated on the basis of laboratory values in the respective categories on a scale of 1 – 10, and a mean value is also calculated from this.

	2K Duo
Single scratch	9
Abrasion	10
Wear	9
Chemical resistance	9
Mean value	9.3 -> 9

Calculation example using 2K Duo

As shown on the product

Explanation of symbols

	EMI CODE® EC1 PLUS and EC1R: Very low emissions		Suitable for children's toys according to DIN EN 71-3		Connected Systems: System guarantee for LOBA sealing products and oils for Wakol adhesive and levelling compounds		Non-slip according to DIN 51097 evaluation group A
	EMICODE® EC1 and EC1R: Very low emissions		Emissions-tested construction product, Class M1		Emission-tested construction product according to French VOC regulation		Non-slip according to DIN 51097 evaluation group B
	EMICODE® EC2 and EC2R: Low emissions		Emissions-tested Construction product compliant with DIBt principles				Non-slip according to DIN 51130 evaluation group R9
			Eco-friendly and low-VOC product				Non-slip according to DIN 51130 evaluation group R10
							Non-slip according to DIN 51130 evaluation group R11

	Consumption in liters		Container size		Pallet unit
	Consumption in grams		Packaging unit		

GISCODE key

DGNB quality level for finishes and oils*

W1	Water-soluble surface treatment agents, solvent-free	4
W2+	Water-soluble surface treatment agents, solvent content up to 5%, N-methylpyrrolidone-free	4
W2/DD+	Water seal with hardener containing isocyanate, solvent content up to 5%, N-methylpyrrolidone-free	4
W3+	Water seal, solvent content up to 15%, N-methylpyrrolidone-free	2
W3/DD+	Water seal with hardener containing isocyanate, solvent content up to 15%, N-methylpyrrolidone-free	2
Ö10+	Oils/waxes, solvent-free, butanonoxime-free	4
Ö10/DD+	Oils/waxes, solvent-free, oxime-free, with hardener containing isocyanate	4
Ö20+	Oils/waxes, low-solvent, de-aromatized, oxime-free	2
Ö40+	Oils/waxes, contains solvents, de-aromatized, oxime-free	1
Ö40/DD+	Oils/waxes, contains solvents, de-aromatized, oxime-free, with hardener containing isocyanate	1
Ö60	Oils/waxes, containing high amounts of solvent (> 15%), de-aromatized	-
GE10	Emulsions / dispersions (contain surfactants)	
GE20	Emulsions / dispersions, contains solvents (5% - 15%)	
GG0	Basic cleaner, other	
GG10	Basic cleaner, solvent-free, not labelled	
GG60	Basic cleaner, irritant, contains solvents, with H-substances (aminoethanol, butyl glycol, ethanediol, N-methylpyrrolidone)	
GG80	Basic cleaner, caustic, contains solvents	
GU40	Maintenance cleaner, solvent-free (contains surfactants)	
GU50	Maintenance cleaner, contains solvents without H-substances	
GU70	Maintenance cleaner, solvent-free, irritant	
GU73	Maintenance cleaner, solvent-free, irritant (including severe eye damage)	
GU83	Maintenance cleaner, contains solvents, irritant (including severe eye damage)	
G1	Basic sealant and wood putty with high solvent content, de-aromatized and free of substances with a low boiling point (solvent content > 15%)	
G2	Basic sealant and wood putty with high solvent content, de-aromatized and containing substances with a low boiling point (solvent content >15%)	

* The DGNB certification for sustainable buildings rates our products using the criterion ENVI.2 Local Environment Impact. Quality level 4 is the highest that can be achieved.

New website features

PRODUCT FILTER

Are you looking for the perfect product for a quote or a special range of use? Simply enter the filter criteria and find what you need!

CONSUMPTION CALCULATOR

Don't worry about the right order quantity - we'll take care of it. Enter the specifications and we'll tell you how much you need for your project!

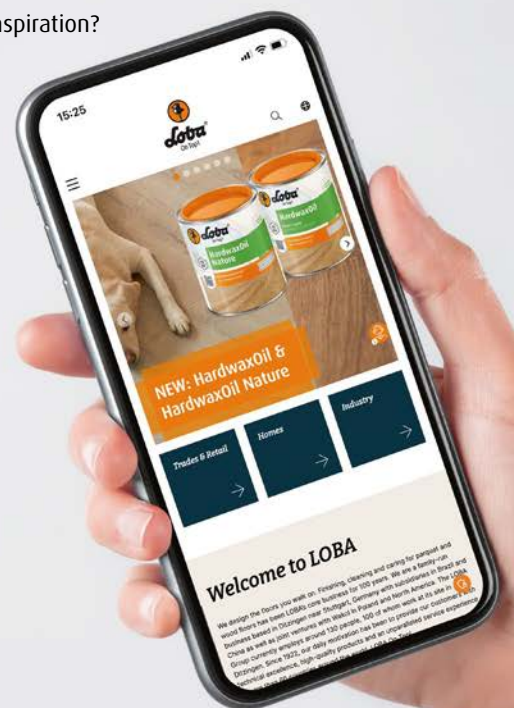

INSPIRATION & APPLICATION

Are demanding customers or specific tenders posing a challenge for you? You'll find ideas and background information here.

REFERENCES

Are your customers looking for inspiration? You've come to the right place! Let them browse through our references and collect ideas.
