Storage and transportation

36 months of storage stability. No hazardous material according to ADR. Store and transport between +5 to +25°C. Protect from frost.

GISCODE

GU40

Application

- Shake the contents well.
- Observe the general and, if available, the product-specific health and safety instructions. More specific information relating to GISCODE can be found in the usage instructions, which are available at www.wingis-online.de.

Application tool/application rate

Spray on and wipe off with a LOBATool wiper mop. 150 - 200ml for 100m² (1l for up to 1000m²).

11/12/2019

Application

Application:

Open the pump spray head on the container and moisten the surface to be cleaned in sections. Then use the LOBATool wiper mop to work over the surface in loops. Replace dirty mop coverings or rinse under running water. Heavily soiled coverings can be washed in a washing machine at 60°C.

Using too much water and allowing the product to work for too long can cause swelling of parquet and cork flooring and must therefore be avoided.

General guidelines

Cleaning of tools: Clean tools and equipment immediately with water.

The information in this document and all other advice and recommendations that we provide to help and assist the applicator are based on previous experience and relate to Spezial conditions. Because of the wide range of possible uses and conditions of application of our products, we do not relieve users from the need to carry out their own trials or to seek technical advice by speaking to the LOBA application engineering department. Observe the floor covering manufacturer's recommendations and the provisions of the current standards. Our liabilities and responsibilities are exclusively in accordance with our Terms and Conditions and are not extended by this information or by our advice. The publishing of a new technical data sheet automatically invalidates the earlier version.
